Dear Sirs,

The FUNDAÇÃO GAIA (Gaia Foundation) is a non-profit organization, working in the fields of rainforest preservation, sustainable agriculture and ecology in general.

As we communicate with organizations all over the world and intend to do this via modem in the near future we would like to join the GreenNet. Can you please send us all available information about GreenNet and the services you offer?

Our federal telephone company EMBRATEL (Empresa Brasileira de Telecomunicações) offers a cheap service that allows us to access three networks/services in London: IPSS, PSS, HULL. Can we have access to the GreenNet through one of these services? What would be the procedure?

Do we need any special software to connect GreenNet? What software do you offer?

How can we use the databases? And last but not least: What does it cost?

We hope to hear from you soon. For your help and your information thank you very much in advance.

Wishing you all the best for your work.

Sincerely,

Birgit Zimmerle
