

I was very active in the early days of the internet in the process of developing the standards it works by. This page contains old papers from my work with URI's, including some very early proposals for URLs.

- [One of the first URL discussions - Oct 21, 1991](#)

- [URN to URC scenario document](#)

An expired Internet Draft on scenarios for resolving URN's to

URC's.

- [Oct 94 URN draft](#)

- [URN proposal](#)

An expired Internet Draft of a scheme for URNs

- [Integrated Internet Information Architecture paper](#)

Presented to the Internet Architecture Board - October 94

- And this link to the [URL mailing list 1993-1996](#)

where some of the architects of the net (including Tim Berners Lee, Kahle, Marc Andreesson and Mitra Ardron) figured out how to do URLs and tried to do URNs. [\(zip\)](#)
